Coronation 7 Monitor 3

The local hockey team went up to Coronation, on Tuesday, and crossed sticks with their team. The game was played in the evening before a large and noisy crowd, who had waited patiently for over three hours for the Monitor bunch to reach the scene of battle. The train was over three hours late and eleven o'clock had struck before the puck was faced off. From the outset of the game the visiting team was at a disadvantage, having never played at night before, under lights, and Coronation had scored four goals on Monitor, in about ten minutes, but held them down to three goals during the remainder of the play. The final score was Coronation 7 Monitor 3. Playing by electric light, for the first time proved a big factor in the loss of the game, and the six-hour trip on the train did not help any, and besides the Coronation bunch is a tidy outfit of hockey players, and a hard nut to crack. They are a fast and tricky aggregation and always on the job throughout the whole game.

They will play a return game here within the next two weeks.

Messrs. Gould, Horsch, Vanhorn and Matheson composed the Monitor rink, that journeyed to Coronation on Tuesday, in quest of the Blair Cup.

Owing to the lateness of the hour when they reached Coronation, only 12 ends were played and the Monitor rink was on the short end of the score, 14-3. The curlers were royally entertained by the winning rink, which was skipped by H. S. Northod.

Another attempt will be made, in the near future, to lift the Cup.

The Annual Meeting of the Monitor School District was held, last Saturday afternoon, in the Schoolhouse, and only a small number of ratepayers were present.

Glenn Beamer, Roy Cramer, Sam Lewis and Geo. Lucas were nominated for the vacancies on the School Board; Cramer and Lewis being elected.

The retiring trustees were J. R. Blair and W. H. Olson.

The report of the Secy Treas showed the following figures:

Outstanding taxes	\$4,518.81
Total assets	11,777.00
" liabilities	3,291.00
Total assessment	330,500.00
Total property value	2,446.00
Government grant	412.50
Total area (acres)	12,208

KIRRIEMUIR

After a four-fold operation, at the Altario Red Cross Hospital, Mrs. E. Morris is progressing wonderfully well.

We are also pleased to hear that Fred Brocklesby is doing so well after his operation.

The Kirriemuir G. W. V. A. will hold its Annual Meeting on Friday, Jan. 20th. Election of officers will be held.

There will be the awarding of Diplomas at 11.00 a. m. on Sunday next, Jan. 22nd, to the scholars of Kirriemuir Sunday School.

Where will you be next Sunday? If possible come to any of the Kirriemuir Services.

Besides the above, service will be held at Viewland School at 3 p. m.

Come along to the weekly Devotional meetings, every Wed. afternoon at 2 p. m., on Jan. 25th at Mrs. Aizzier's.

E. Morris was a visitor in Monitor on Tuesday.

Carl Gustavson and others got eight cents a lb for their hogs, at Monitor, on Tuesday.

Gay and Mrs. Canwell are visiting at Loyalist this week.

R. Cramer, H. Bowers and J. Martin were recent visitors in Coronation.

The Annual Provincial Seed Fair will be held in Edmonton on Feb. 13 to 16.

The Red Cross Society is making an appeal, throughout the province, for the necessary funds to carry on the work of relief in Southern Alberta. A sum of \$40,000 is required.

Stonelaw U. F. A.

The Local will meet in the Minor Schoolhouse on Friday, Jan. 27th, at 8 p. m. Report of the Delegates and other important business.

There will be a dance after the meeting. Please bring refreshments.

ANNUAL MEETING

The Annual Meeting of the Monitor Branch, G. W. V. A., will be held Thursday afternoon, Jan. 26th, in the Bank Building.

United Meeting of Coronation Veterans, Consort. Monitor and Kirriemuir G. W. V. A., in the Hotel Dining Room, Thursday evening Jan. 26th. Supper will be served at 8.30, followed by a smoker. E. Poole, 2nd Vice-Pres. Provincial Command, G. W. V. A., will address the gathering.

All visiting comrades cordially invited to attend.

Local Happenings

S. King, T. Partridge, J. B. White and I. Rittenhouse are attending the Provincial U. F. A. Convention being held in Calgary, this week.

The Mayor of Penukin is in Calgary, this week, taking in the Bouspiel and other sports at the Winter Carnival.

Roy Sheppard, New Bridgen, has taken over the management of the local Hotel.

It was rumored around that our local apothecary, J. Gray, had gone up to Edmonton on a very momentous errand. But he is still on the list. Now, girls, don't crowd.

Arthur Todd lost one of his mares, last week, when it got down on its back in a straw stack and could not get up on its feet again.

-Skating, hockey, curling and coasting are being indulged in this winter more than ever before, and the fine weather, this winter, has helped greatly in bringing so many out to enjoy these winter pastimes.

The local rink was a very busy place, last week, the fine weather and bright moonlight proving an ideal attraction to the skaters.

A schedule has been made up for the curlers, and they are busy every night.

The Ratepayers of the local School District showed very little concern about the affairs of the District, only about five per cent of them attending the annual meeting, held Saturday afternoon. Even the added attraction of the election of two trustees failed to arouse any enthusiasm on the part of the ratepayers.

J. Ehlinger and family are spending a couple of weeks, at Provost, visiting relatives.

Mrs. C. Todd, Loyalist, was a recent visitor at Monitor.

Canada's Needs

No. 3—A World Market

In urging the view that one of Canada's needs at the present time is a world-wide market for the products of its farms, forests, fisheries and mines, but chiefly its farms, perhaps it would be nearer the mark to say that Canada needs national action by its Federal Government to direct the products of this country to those foreign markets where there is a demand at a profitable price for the very things this Dominion requires to sell and can raise in abundance.

Of all the great producing countries of the world it is possibly not incorrect to say that, speaking nationally, Canada is the most backward of all in promoting trade in other countries. In the years before the war, Germany, under the direct guidance of its national government, was pushing its wares into every nook and corner of the world. Great Britain has for long years been wide awake and active in extending its trade all over the world, and Government agents have been a big factor in developing British trade and the sale of British-made goods in countries both civilized and uncivilized. The United States, too, handicapped though it was because of a lack of merchant shipping has not neglected its opportunities and U.S. consular representatives are active agents in promoting United States trade.

But Canada has done little or nothing. The efforts put forth have been puny and perfunctory, penny-wise and pound foolish, lacking in vision and totally devoid of real initiative and aggressiveness.

In Canada, both Government and people have, for the most part, been quite content to allow the export trade of the country to be handled and controlled by other countries, with the natural and inevitable result that it has always taken second place to the interests of those countries through which it is controlled. The Government has not had wide awake and trained representatives in foreign countries to size up the situation there, inform our Government of conditions of which Canada could take advantage, and no national machinery whereby such opportunities as presented themselves could be quickly seized.

For example, it has recently been stated by a writer who quoted facts and figures in support of the statements made, that during the past year when livestock were a drug on the Western Canadian market and where a price could not be realized to cover the costs of production there was an active demand at high prices for cattle in Mexico, where, because of the many years of revolution and political upheaval, the livestock of the country was reduced to a minimum. In Mexico, this writer declared, was a ready market at high prices for the very animals which Canada had in abundance and was unable to sell.

In Mexico, alas, high prices, almost excessive prices, were being paid for wheat and flour, while the best price obtainable by our Western Canadian farmers for their wheat was less than the cost of growing, harvesting and marketing the wheat through the old methods and channels.

Why has Canada not built up a department of the national government which would, through its foreign representatives, be made immediately aware of such conditions, and which could at once set national machinery in motion to take full advantage of the opportunities thus presented? Instead, we have remained idle, trusting to Old World conditions to right themselves so that our wheat could flow with a profit to Liverpool and Europe, or dribble into the United States, and, with our live cattle shut out of Britain, we have disposed of our cattle at a loss or made meagre sales on the Chicago market.

Canada is a full-fledged member of the League of Nations; our statesmen and politicians, public men and newspapers speak of Canada as a nation. We may as a people be beginning to think nationally, but we have yet to begin the important work of acting nationally. Yet there is no country today in a better position to undertake a national commercial undertaking, and no country stands quite so badly in need of it.

Canada possesses a great system of national railways—the largest mileage under one management of any railway in the world—and it also possesses the greatest private-owned railway in the world, and the most efficient. Canada likewise owns and operates a national merchant marine with steamers plying on all oceans. The national railways and national merchant marine are both operating at a loss, with annual deficits of between fifty and one hundred million dollars. What they need, is more business. The whole country is suffering for lack of markets wherein to sell its surplus products at a price which will yield a profit over production costs. Yet with all this national equipment ready to our hands, the Federal Government has not seized the opportunity of organizing a real department devoted to the development of foreign markets for Canadian produce.

It is time Canada had a national trade organization with aggressive, expert representatives in all foreign lands offering even a remote chance of being a profitable field for Canadian trade.

Meteors Cause Forest Fires
France has been suffering from forest fires of mysterious origin; the careless cigarette smoker has been blamed, but foresters and some meteorologists now incline to the belief that falling meteors were the cause. In one flame-swept area of a thousand acres were found great meteoric fragments, still hot three days after the fire.

DODD'S KIDNEY PILLS

FOR ALL KIDNEY DISEASES

RHEUMATISM, GRAVEL, BRIGHT'S DISEASE, DIABETES, BACKACHE, OBST. THE PAIN

W. H. U. 1402

Always Ready and Reliable—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

People at Sea Had Real Christmas

Programme Was Prepared by Canadian Pacific Steamships Limited

Special arrangements were made by the Canadian Pacific Steamships Ltd., for a real celebration of Christmas by those upon their ships in mid-Atlantic. Christmas trees with presents for old and young, Divine Service, a real old-fashioned Christmas dinner, a Christmas dance, games and sports of all kinds for the children and grown-ups too, were some of the items included in the Christmas Day programme.

One hundred years ago the only known use for rubber was for re-meying pencil marks.

Minard's Liniment for Distemper

The Golden Age

The Luxuries of the Past Are Only the Common Comforts of Today

The comforts of 1921 are the luxuries of 1870. What household of that time could obtain the devices which are the common indispensable equipment of our day? Our young men and maidens who demand a standard of living which the youth of 1870 had never thought of may be distressing to old-fashioned people, but they are obeying natural forces. The Victorians themselves were not content with what satisfied the eighteenth century. That all these changes have made for happiness we may feel no compulsion to believe. But there is nothing in the past to justify us in expecting that the young people of the present will be content with what satisfied us in our youth. They may be going on the road to the true golden age; they may have chosen the primrose path which leads to the everlasting bonfire. What is certain is that they will not stand still—London Daily Telegraph.

Grain In Storage

Wheat Stored in Public Elevators Shows An Increase

Grain statistics issued by the Dominion bureau of statistics for week ending Dec. 30, 1921, show an increase of 412,379 bushels in the amount of grain stored in Canadian public elevators. The figures were as follows:

Oats, 112,491 bushels; barley, 263,044 bushels; and rye, 2,835 bushels. Wheat and flax show decreases of 17,369 bushels and 22,750 bushels respectively.

WHY BEAUTY FADES

A Condition Due Entirely to Poor, Watery Blood

The girl who returns home from school or from work thoroughly tired out will be fortunate if she escapes a physical breakdown, because this getting tired so easily is probably the first warning symptom of a thinning blood that must not be disregarded if her health is to be preserved.

When the blood becomes thin and impure the patient becomes pale, haggard and nervous. She not only tires out easily but suffers from headaches, palpitation of the heart, dizzy spells and a loss of appetite. This condition will run from bad to worse. If prompt steps are not taken to increase and enrich the blood supply. To make the rich, red blood that brings the glow of health no other medicine can equal Dr. Williams' Pink Pills. If given a fair trial their use brings rosy cheeks, bright eyes, a good appetite and good spirits. Dr. Williams' Pink Pills have made thousands of pale, languid girls active and strong. On the first sign of poor blood mothers should insist upon their daughters taking a fair course of these pills. They will not only restore health, but will save further doctor bills.

Dr. Williams' Pink Pills can be obtained from any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from "The Dr. Williams' Medicine Co., Brockville, Ont.

He that blows the coals in quarrels has nothing to do with as no right to complain if the sparks fly in his face.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

First Things Today
The first thing some people want when they get a little money is a car; then the first thing they want when they get a car is a little money.

USE SLOAN'S TO EASE LAME BACKS

YOU can't do your best when your back and every muscle aches with fatigue. Apply Sloan's Liniment freely, with rubbing, and enjoy a penetrative glow of warmth and comfort.

Good for rheumatism, neuralgia, sprains and strains, aches and pains, sciatica, sore muscles, stiff joints and the after effects of weather exposure.

For forty years pain's enemy. Ask your neighbor. Keep Sloan's handy. At all drug stores—35c, 70c, \$1.40. Made in Canada.

Sloan's Liniment (Patented)

Minard's Liniment for Colds, Etc.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

THE CENTAUR COMPANY, NEW YORK CITY

Giant Shell Of War

Heavy Explosive Has Just Been Dug Up Near Mons

A shell weighing two tons, dropped from a height of a mile on the village of Havay, not far from Mons, in the last year of the war, has just been dug up.

It did not explode when it fell, but made a hole in the earth about fifty feet deep. It is believed that its charge of explosive weighed nearly three-quarters of a ton, and the excavation of such a monstrous shell was a work of great anxiety.

The Oil for the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years, have been using it can testify to its value as a lubricant.

Where Ignorance Is Safety

A Virginia man never saw an automobile until Friday, his 98th birthday. That's one reason he's 98!

Minard's Liniment for Garget in Cows

They Profit Most Who Serve Best

Heroic Example of the Power of Advertising

Somebody out of touch with truth, once said there is no sentiment in business. Another greater in wisdom, declared: "They profit most who serve best."

All this year a concern that helped put Burlington, Vermont, on the map of national business, is celebrating fifty years of successful service of the womanhood of the world. "Diamond Dyes" is half a century old and they are having a series of happy episodes to make the anniversary a noteworthy one.

"Diamond Dyes" is a heroic example of the power of advertising, for the plant of small beginnings now covers a city block. The business was built on "making good" the advertising that has made "Diamond Dyes" a household word. Possibly the greatest asset of this proved aid to economy, is the good-will of families that run through generations. Young women tell us that their mothers and grandmothers before them, were Diamond Dye enthusiasts. They like the Diamond "service plan" which makes it clear that for a few cents it is easy to "dye old things new."

The Wells & Richardson people are going to make the golden jubilee of Diamond Dyes nation wide. They will do this by the biggest newspaper advertising appropriation ever made in the fifty years of service.

Minard's Liniment for Colds, Etc.

Mother! Move Child's Bowels With California Fig Syrup

Hurry mother! Even a sick child loves the "fruity" taste of California Fig Syrup and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

The Girl Proposes

The inhabitants of Himla, in the Greek Archipelago, are engaged almost entirely in sponge fishing. When a girl desires to marry she waits until she has obtained the number of sponges from the sea that corresponds with the number of years she has lived. These she places in a silk net, which she presents to the man of her choice. Should he refuse, his chances of obtaining another bride are remote, as usually the Himla maiden shun him as a punishment.

All Men and Women

When in Need of a Tonic Should Start on the Road to Wellville by Following This Advice

Peterboro, Ont.—"I can speak in the highest praise of Dr. Pierce's medicine. I suffered for a long time with feminine weakness, through which I became all run down, weak and nervous. I also had severe backaches, pains in my side and bearing pains. I learned of Dr. Pierce's medicine and began at once to take them. I took two bottles each of the 'Favorite Prescription' and the 'Golden Medical Discovery' and they completely cured me of all my weakness and restored me to good health."

"At one time my husband became afflicted with a chronic cough which caused him to become all run down. He got so thin he was almost a skeleton. He tried many medicines but did not get any better until he took Dr. Pierce's Golden Medical Discovery. By taking this medicine he was completely restored to good health. I shall always speak a good word for Dr. Pierce's medicine."—Mrs. Martha Sholer, 375 Bethune St.

If you need a building-up tonic for stomach and blood obtain Dr. Pierce's Golden Medical Discovery from your nearest druggist or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial pkg. tablets and write for free confidential medical advice.

Minard's Liniment for Colds, Etc.

What Western Canada Has Still To Offer The Prospective Farmer

Reading such statements of the development of Western Canada as the growth of cultivation in the four western provinces from 11 million acres in 1910 to 30 1/2 million acres in 1920 and an increase in the value of field crop production of from 4 millions in 1880 to 626 millions in 1920, the impression might be created that the limit of agricultural development had been reached and the pinnacle of wealth production attained. Just how far this is from actuality can only be appreciated from an adequate appreciation of the immensity of the west which is a difficult matter to grasp, and to realize the comparatively small area of the vast stretches which constitute Western Canada which has been brought under cultivation and rendered productive.

For peoples of other lands, especially the European accustomed to the narrow confines imposed by their national boundaries, it is difficult to form even an approximate idea of the vastness of Canada and of that country known as the "West." Canada, nearly a third again as large in area as the United States with its hundred million people, shelters a bare nine million on her broad expanse. The never ceasing stream of immigration which pours into Canada empties its rich content to be spread over the broad land, and peoples are immediately lost and absorbed without any appreciable effect. Notwithstanding the phenomenal development the west has witnessed in the past twenty-five years, there are still giant stretches of undeveloped, fertile agricultural land containing thousands of potential homesteads of the highest productivity merely awaiting the fruition of settlement.

The province of British Columbia, over which wait the gentle breezes from the Pacific Ocean, and which contains such a diversified natural wealth, contains an area of 395,000 square miles or more than four times as large as the island of Great Britain. Of this huge area there are 30,000 acres which have been estimated to be cultivatable whilst only 350,016 acres in 1918 were producing. With a name now world famous for fruit production, and a successful following in every other line of agriculture, the province's present agricultural revenue, amounting annually to many millions can be extended cultivation be augmented 160 times before any limit is reached.

Alberta once the province of the giant ranches and now an area of countless mixed farms, has an area of 162,765,500 acres, being nearly three times the area of Great Britain. According to Dominion Government estimates there are some 105 million acres of good agricultural land in the province whereas only a little over 9 million acres were producing crops last year. When it is considered that field and root and fodder crops in 1920 accounted for a revenue of about \$250 million some small conception of its possibilities of agricultural wealth may be formed as well as the extensive openings still remaining for settlement.

Saskatchewan, which has produced more wheat growing champions than any other region of the American continent, has an area of 251,700 square miles, falling but slightly under Alberta in the matter of size. Some 155 million acres have been declared suitable for cultivation and potentially capable of producing the same high quality cereal which has carried off the world's premier honors so many times in the past ten years. Yet last year all crops accounted for a cultivation of less than 20 million acres, which indicates that notwithstanding the favor the province has found with wheat growers and the heavy influx of new farmers it has experienced there will be room for many more for years yet to come.

Though the tide of immigration ever flowing westward seems to be lost in the immensity of the Canadian West there is striking indication of the effect of its current in the steady drive of settlement northward. Though there are thousands of virgin acres still awaiting settlement, the record area at which they are being fenced and broken and the annual rise of land prices point to a time not

far distant when land may no longer be acquired for the proverbial song and the great "Granary of the Empire" be nearer its capacity in the production of agricultural wealth.

Over Four Million Needed For Loans

Rural Credits Societies of Manitoba Require Large Sum
Four and a half million dollars will be required to finance the 1922 operations of the Rural Credits Societies of Manitoba, according to officials of the Provincial Government. Loans for 1921 amounted to \$2,800,000. Already \$400,000 new loans have been made for 1922 farm work and to assist farmers in buying seed.

Lumber Being Cut On Nahanni River

Large Quantities of Fine Spruce Are Practically Untouched
A million feet of lumber is being cut on the Nahanni River, which will later be delivered to the government sawmill at Fort Simpson, arriving there by rail in the spring. The timber will be utilized for the construction of various buildings in the north for government purposes. In this area there are large quantities of very fine spruce of large diameter which up to the present have been practically untouched.

Canadian Fur Farms

Total Value of Animals in 1920 Over Four Millions
There are no less than 587 fur farms in Canada, according to the Bureau of Statistics. Silver, patch, red, blue and white foxes are bred, also mink, raccoon, skunk, fisher, lynx, martin and Karakul sheep. There were 13,395 silver foxes on the farms in 1920, three blue foxes and only one white fox. The total value of fur-bearing animals sold from these fur farms last year was \$763,221. The number of live foxes exported during the fiscal year March 31, 1921, was 1,070, value \$277,182.

The world uses up an average of three million needles a day.

Armenian Relief

Hundreds Are Dying Daily From Starvation In Armenia

A general appeal is being made to farmers of Western Canada this winter to contribute gifts of wheat to starving Armenians. The appeal so far has been responded to generously, William Irvine, western director of near eastern relief, declares.

"After one of the most disappointing crop years in the history of the west," Mr. Irvine said, "the farmers have forgotten their own troubles long enough to contribute widely to the relief of Armenians in grain and money to buy grain. If they can do this, surely others, less fortunate, may follow their lead."

Already more than \$5,000 in cash and \$9,000 in grain has been given on pledges. If money is given, it is used to buy wheat at cost. It is carried to the granaries threshed, and probably will be hauled by railways free of any charge whatsoever.

The appeal on behalf of Armenia is one of the most stirring ever put forth, according to directors. Hundreds there are dying daily from starvation. "Death wagons" drive through the streets of one city every morning and pick up from 25 to 30 bodies. Many of children who have died from lack of nourishment. There are 20,000 orphans in one Christian orphanage, and 20,000 more who cannot be taken in, it is said. There have been no crops this year in any part of the country owing to the massacres of the Turks.

A ship will leave an American port early in the New Year bearing food from Canada and the United States. Mr. Irvine said. Contributions or pledges should be sent to C. W. Rowley, Winnipeg, treasurer of relief.

Timber Industry Of B.C.

Mills Operating Steadily and Thousands of Men Employed

Directly and indirectly the timber industries of British Columbia represent nearly half the trade and commerce of this province. In 1920 they produced nearly \$32,000,000 worth of commercial material and it is estimated that this year will run well over the \$400,000,000 mark. There have been 1,400 logging operations in the province during the past two years, 340 sawmills, 100 shingle mills, six pulp and paper plants, all operating steadily. The output in 1920 was approximately 2,000,000,000 feet of wood products and over 20,000 men were employed to produce this enormous quantity.

Outlook For Agriculture Is More Promising For The Coming Season

Speaking at the weekly luncheon of the Rotary Club, Regina, Mr. F. H. Auld, deputy minister of agriculture, expressed the belief that the prospects for agricultural production in Western Canada and for a relative greater purchasing power on the part of the farmers are distinctly better for 1922 than they proved to be in 1921.

The difficulties in which the farmers find themselves this winter, as a result of their operations during 1921, are due not to crop failure nor to the low price of wheat, but to the fact as Mr. Auld put it, that "in his deflation experiences" the farmer has not had enough company. "The farmer has not had enough company," says the Regina Leader. Which simply means that while he was compelled to sell his wheat and other farm produce at approximately pre-war prices, everything he had to purchase had to be paid for at still undated prices. This applies to farm implements, which reached record prices last year; farm labor, whose wages were but little below the peak created by the war; and transportation, which was never higher.

The solution of the farmer's problem will not be found in higher prices for his products but in the deflation or lowering of the prices of the things that go to make up his operating expenses. The re-establishment of the normal margin between cost of production and the return obtained from the sale of his crops and livestock is the farmer's financial salvation and the price deflation necessary to bring this condition about is already on its way. A slight reduction in freight rates has already been put into effect and there is hope that further reductions may be secured. A material reduction in the prices of farm implements has also taken place. The general downward trend of prices of the principle necessities of life continues. Wages for farmhands must sooner or later readjust themselves to the new condition.

Grain production in Western Canada depends largely upon available moisture and throughout the province the quantity of moisture in the soil at the present appears to be greater than the average for the last ten years, although this may not be the case in certain limited areas. Another important factor in production is the

acreage prepared for crop and the quality of tillage work done. The acreage of new breaking and of fall plowed land for the 1922 crop is about average; but the land summerfallowed in 1921 is approximately one-third more than the average.

The production of meat animals has been discouraged by low prices and restricted markets. There are indications, however, that spring production is again on the increase, stimulated undoubtedly by the low prices for coarse grain and the need for augmenting the farm income; and dairying is making very rapid strides. A further stimulus to this industry may be expected from the disposal by the British Government of its wartime stores of dairy products and the consequent re-opening of the British market to Canadian producers on a basis of normal prices. The production of beef animals has been set back by low prices and restricted markets—especially the United States market, which is the outlet par excellence for Western Canadian cattle; and it is to be hoped that the new Government at Ottawa will find it possible to secure some relief in that direction.

A greater stability in farm produce markets in 1922 is looked for by Mr. Auld, as a result of the passing of wartime restrictions and the disposal of government stores of meat, butter and other farm products. An increase in values is not to be expected; but a gradual improvement in the farmer's position brought about by increased purchasing power rather than higher prices may be anticipated. The purchasing power of grain and livestock in comparison with wholesale and retail prices of other commodities has apparently reached its lowest point and will begin to improve. Commodity prices must decline, as any further relative decline of agricultural products will result in rural depopulation and therefore lessened agricultural production. The 1922 crop may prove disappointing to the farmer himself and to those with whom he does business, viewed from the angle of the purchasing power and debt paying capacity of the farmer; but it is Mr. Auld's opinion that the pendulum has begun to swing toward the farmer again and that the present outlook for 1922 is for a decidedly better year than that just ended.

Feeding For Egg Production

To Obtain the Best Results a Supply of Animal Food is a Necessity

It can be definitely laid down that the egg yield of the average flock of fowl would be increased materially by feeding a larger supply of animal food. So says a circular styled "Beef Scrap versus Skim-Milk for Egg Production," just issued by the Department of Agriculture, Ottawa, the author of which is the Superintendent of the Dominion Experimental Station at Cap Rouge Que. The three main supplies of animal food required by laying hens are fresh green cut bones, beef scrap and skim-milk, and of these the last mentioned has proven the best stimulant to egg production. The milk may be fed sweet or sour, but always the same, as any alteration is liable to lead to bowel trouble. It should also never be allowed to freeze. If milk is not available in sufficient quantity, then either beef scrap or fresh cut green bones can be fed to supply the deficiency. Buttermilk is beneficial. The main point is that, in order that hens may do their best, they must be given animal protein to a liberal extent. These are the conclusions reached after an experiment in fowl feeding conducted at Cap Rouge for five years. For small backyard flocks table scraps have been found satisfactory, but for the average farm flock, where greater outdoor space is to be had, the scraps do not usually contain sufficient meat. In order that the birds may obtain skim-milk in the quantity they need, it is well to put it before them in an open pan. Fish scraps and fish meal can be used to a limited extent. Fresh meat scraps are advisable only in cold weather.

By making your purchases from your home merchant you are contributing direct to the prosperity of the community in which you live.

Canadian Apple Exhibition

The speed at which Canadian products can be put on the market in England was strikingly demonstrated recently.

The Department of Colonization and Development of the Canadian Pacific Railway recently shipped by Dominion Express on the "Empress of Britain" a consignment of Canadian apples for exhibition at 63-65 Charing Cross, and the other offices of the company in Europe. The apples came from various Canadian provinces, and it is interesting to note that some of them actually left the producer and were on show in less than eight days. For instance, the Ontario consignment left

Trenton, Ontario, at 2 a.m., November 1, by C.P.R., arrived Montreal at 8 a.m., left at 9 a.m., and arrived Quebec at 3 p.m. They were immediately placed on board the Canadian Pacific liner "Empress of Britain," which arrived Liverpool on Tuesday morning, Nov. 8. Before the last passenger was off the ship the apples were discharged, whisked in Dominion Express motors to the special train to Euston Station, London, which was reached soon after 2 p.m. the same day. Here Dominion Express vans

collected them, and at 3 o'clock they were on exhibition in the windows of the Canadian Pacific at Charing Cross, with a card reading: "Canadian apples, from producer to consumer in less than eight days."

Though Canada is three thousand miles from England, our system of quick transportation is bringing us nearer to that country every day. Recently the "Empress of Britain" went to Liverpool and back to Quebec in 15 days, including the time taken in embarking and disembarking passengers.

TELLS HOW CATARRH IS DESTROYED QUICKLY

Catarrh sufferers, meaning those with colds, sore throat, bronchial trouble, etc., can all be fixed up right at home by taking "Catarrhose." In using Catarrhose you don't take medicine into the stomach—you just breathe a healing piney vapor direct to the lungs and sinuses. The purest balsams and the greatest antiseptics are thus sent to every spot where catarrhal trouble exists—germs are killed, foul secretions are destroyed, nature is given a chance and the disease ends quickly. Colds and throat troubles can't last if the pure healing vapor of Catarrhose is breathed—sneezing and coughing cease at once, because irritation is removed. Bronchitis irritation and weakness in the throat soon disappear. Use Catarrhose whether young or old. Two months treatment \$1.00, small size 50c, dealers everywhere or The Catarrhose Co., Montreal.

The Homesteaders

"It's closing time now," said the teller, addressing the manager. "We have enough cash on hand to pay this gentleman, and we can wire for more bills, which will reach us in time for tomorrow's business."

"Pay it, then," said the manager. "Mr. Harris has a right to his money in that form. He wants it. But," he added, turning to Harris, "I'd advise you to keep both eyes on it until your transaction is completed."

The counting of the money was a bigger task than either Harris or Allan had thought, but at last it was completed, and they were ready for the road. The banker looked after their buggy as it faded out of sight up the river road.

"Hang me if I like that!" he said to himself.

The long drive up the valley in the warm August afternoon was an experience for the soul of painter or poet. Even when Allan Harris, schooled as they were in the religion of material things, felt something within them responding to the air, and the sunlight, and the dark green banks of trees, and the sound of rushing water, and the purple-blue mountains heaving and receding before them. The sweet trickled in narrow tongues down the backs of their horses, reminding them that the ascent was mainly a matter of time. As they topped each new mountain, they looked expectantly forward to a greater revelation of the mountains, but this was constantly denied

No Appetite

Nervous exhaustion leads to distaste for food. The nerves of the stomach are weak, digestion fails and you become generally upset and out of sorts.

The secret of complete restoration is in getting the nervous system fully built up.

Mrs. R. Cheney, 208 Richmond St., Chatham, Ont., writes:

"I was troubled with indigestion, which caused me many sleepless nights. I would be in terrible distress at times, and would get no relief for two or three hours. For sixteen months I ate nothing but Shredded Wheat biscuits, as I dare not eat anything else. As I did not know what to do, as I had tried so many different remedies, as well as doctors' medicines, without gaining permanent relief. Finally I got some of Dr. Chase's Nerve Food, and while on the second box noticed that I was improving. I continued the treatment until I am now fully restored, and have returned to my regular diet. My husband has also taken Dr. Chase's Nerve Food with splendid results, as we are glad to recommend it to others."

Dr. Chase's Nerve Food, 50c a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

W. N. U. 1408

by ever-recurring successions of ridges still ahead. The long, smooth swell of the plain gradually gave way to the more abrupt formations of the foothills, and here and there in their rounded domes protruded great warts of green-grey rock where the winds of ages had whipped the sand down into the valleys. Little clusters of green poplars, like vast goatees, nestled on the northern chin of the hills across the valley, where the Chinook had failed to spread its balmy winter-bligh among them; here and there were swamps of thousands of catties feeding on the brown ranges. The sun, like a bubble of molten gold blown from the bowl of heaven, hung very close to a steel-bright, cloudless sky. Lower it fell, and lower, until a fang of rock two miles high pierced its under-edge, and sent a flood of fire pouring in a thin bright border along the crest of the Rockies. The travelers stopped their horses on a ridge to watch the marvellous transformation that had before them, light behind them, at their feet the shadows creeping up the mountain sides, and the valley beneath transformed as by some fairy wand into a sea of amber.

Allan breathed deeply of the high, clear air, and in his eye was something which revealed that the light which had before them, light behind them, at their feet the shadows creeping up the mountain sides, and the valley beneath transformed as by some fairy wand into a sea of amber. He had no words of expression—no means of conveying his emotion; but he thought of his mother and Beulah—Beulah, who had so often protested against the substitution of existence for life. He had never had much patience with her queer notions, but now, in this moment when he knew that in some strange way he had invaded the borderland of the infinite, Beulah stood up before his eyes—Beulah, his sister, resolute defiant, reaching out, demanding life, life to his father, but he was silenced by the sight of a line of moisture crawling slowly down the weather-beaten cheek. John Harris was driving again the pioneer trail from Emerson; at his side was Mary, young, beautiful and trusting and before them lay life. And they thought of their father. He made a dry sound in his throat, and the horses moved on.

Darkness settled about them. One or two stars came out. The poplars took on the colour of the spruce; the river fretted more noisily in its rocky channel. A thin ribbon of cloud lay across the mountains, and a breeze of wonderful mellowness came down through the passes.

At length, just as they were thinking of pitching camp for the night, Allan espied a deserted cabin in a cluster of trees by the side of the road. They turned into the wood and unbidden the horses entered. The building was some old prospector's shack, long unoccupied save for occasional hunt or rancher, and the multitude of gophers that had burrowed under its rotting sills. The glass was gone from a single window looking out upon the road; the door had fallen to the hinges; the floor had been broken down in spots by the hoofs of wandering cattle. A match resting on a lantern hanging on the wall, and a few cooking utensils, safe from all marauders under the unwritten law of the new land.

The two men first made their horses comfortable, and then cooked some supper on a little fire at the door of the shack. Harris was tired when they entered a space in the corner for the fire, and Harris lay down to rest, the precious bag of money by his side.

"You might as well drop off for a nap," Allan suggested. "They must have been delayed, and may not make it to-night at all. We're here for the night, and you may as well rest if you can. I won't turn in myself until you waken."

"I believe I'll do as you say," his father agreed. "Keep a keen ear and don't leave the building without wakening me."

Allan looked out at different times for Gardner and Riles, but there seemed no sound in all the world save the rushing of water. A cold draught crept along the floor. He fancied his father had fallen into a nap. The night chill deepened, and at length Allan hunk a blanket as best he could across the open door. His gun gave him a sense of companionship, and he took it in his hands and sat down beside his father. It was very lean and graceful in his fingers.

While the banker worked in his garden in the long August evening the thought of the two men with a bag full of money kept recurring and recurring in his mind, and smothering a nervous grief he felt in his abounding cabbage. True, it was no business of his, but still he could not feel entirely at ease. As he bent over his horse he heard a light patter in the street, and looking up, saw the erect form of Sergeant Grey on his well-known Government horse. At a signal from the banker the policeman drew up beside the fence.

They talked in low voices for ten minutes. "It may be a wild-goose chase," said the sergeant at last, "but it's worth a try." Half an hour later his horse was swinging in his long, steady stride up the road by the winding river.

CHAPTER XVI. The Honour of Thieves

Gardner and Riles rode only a short distance out of town, then turned their horses back to the bank and waited. The afternoon wore on heavily, and the gold of suspense hounded them sorely, but there was nothing to do but wait. It would be a fool's trip, as Gardner said, to go

hunting unless they were assured of success.

But at last the Harris' team and buggy rattled by. When it had secured a good lead the two horsemen emerged from their cowering and took a cross road to Gardner's ranch.

"We better eat," said Gardner, and busied himself with starting a fire. "Of course, the cook's out. Fishing, I guess," he continued, as he noticed that Travers' fishing rod was gone from the wall. "Perhaps it's just as well. He might be asking questions."

Riles ate his meal in haste and silence. He was taciturn, moody and excitable, and made no response to Gardner's attempts to open conversation upon trivial subjects.

"Upon my soul," said Gardner at last, "you don't seem any more than enthusiastic. One would think you were going to a funeral instead of a—division of profits."

"Perhaps I am," said Riles stoutly. "We'll know better when we get back."

"Well, if you feel that way about it, you better stay at home," said Gardner, with pointed candour. "If ten thousand dollars is no good to you, perhaps I can use your share in my own business."

"That wouldn't let me out," protested Riles. "You've got me mixed up in it now, and if things go wrong I'm in for it, but if things go right you're willin' to take all the money."

"Things won't go wrong," Gardner assured him. "They can't. Everything is planned to a fraction, but if we see there's going to be a hitch—why, the owner of the mine'll fall to turn up, and we'll all come back to town, and no one a bit the wiser."

Gardner crossed and took a bottle from a cupboard. He poured a big glass and set it before Riles. "Drink that, and the world will look more to your liking," he said.

Riles responded to the liquor, and presently the two were in animated discussion of their plans. Riles was eager to know the details of what he had been kept in complete ignorance, but Gardner would disclose nothing until they were on the road. "Jim may come in any minute," he explained, "and Jim might hear enough to make him curious. And it's just a little too soon to excite his curiosity."

"That reminds me," Gardner continued. "Jim has a very neat little revolver here somewhere. I think I'll borrow it. We might see some game, as Allan says."

A search disclosed revolver and cartridges in Travers' trunk. Gardner loaded the weapon and put it in his pocket.

"What about me?" demanded Riles.

"Ain't I got no gun?"

"Beats me," said Gardner. "It might go off. If we really see any game, and there's a chance of a second shot, I'll lend you this one."

The sun was dipping almost to the mountains when they set out on a cross trail through the valley. Down by the river, well screened with cottonwoods, Travers' house lay close by the ford. He heard voices, and looking up quickly, saw Riles and Gardner riding slowly down the road. At first he thought Gardner had seen him but in a moment he revised that opinion. The two rode close by and stopped their horses to drink from their forefeet in the river. Jim was going to call to them when he heard his own name mentioned. He was no eavesdropper, but he obeyed an impulse to listen and kept out of sight.

"Travers doesn't suspect a thing," Gardner was saying. "It's just as well. He figures on making old Harris his father-in-law some day, and he might do something foolish if he caught on. If the old man loses all his money he won't be so desirable from a son-in-law's point of view. Well, we'll see how he stands the night in the old shack up the river. Strange things have happened there before now, let me tell you, Riles."

If Jim had been prompted by curiosity at first a very different emotion laid hold of him as he caught the gist of Gardner's remarks. He had no delusions about the principles of either Gardner or Riles. His relations with his present employer had been pleasant but by no means confidential, as he had never sought nor valued Gardner's friendship. He was convinced that Gardner was kind in a general way to those with whom he came in contact because kindness cost nothing and might upon occasion be exceedingly profitable.

Riles, on the other hand, was coarse and kind simply because his nature rose to no higher plane. Gardner was clever enough to conceive a monstrous depth of villainy, while Riles was brutal enough to carry out the monstrous part of the plot. Travers had not known Harris to be in the district, but he had suspected for some days that Gardner and Riles were hatching mischief in their long absences together. The information

was not new to him, but it was new to him as he caught the gist of Gardner's remarks. He had no delusions about the principles of either Gardner or Riles. Did Not Dream Tanlac Could Bring Her Such Wonderful Health

"I am only too glad to praise Tanlac, for it has done for me what I never dreamed was possible, and I now feel so well I can hardly realize that only a short time ago I was in such a miserable condition," said Miss Alythe Perth, 551 Carlton St., a popular young Winnipeg business woman, conducting a public stenographic office.

"Just about three years ago I had a nervous breakdown which kept me in bed for several weeks and left me in such an awful state of health I had but scant hope of ever getting better. I was so nervous I trembled all over, couldn't sleep and even after I went back to the office, I seemed to have no strength at all and only through sheer force of will power was I able to attend to my duties. My stomach

soon became disordered, and indigestion caused me the most frightful pains, bloating and shortness of breath. My kidneys also bothered me and I had a pain across the small of my back that made life positively miserable."

"Well, despite the fact that I was trying one medicine after another, I found I was going down hill rapidly. But after taking only two bottles of Tanlac I could see it was doing me a world of good, and seven bottles have relieved me of all my ailments and now my health is just fine. My whole system seems to be in the best of condition, and I eat, sleep, work and enjoy life better than for years. Tanlac is simply grand."

Tanlac is sold by leading druggists everywhere.

that Harris was going up the river to night, apparently with a large sum of money, and the fact that these two men also were going up the river,

gave to Travers' nimble mind framework on which to hang almost any kind of plot.

Progressive Party Will Maintain Identity In The Ottawa House

Winnipeg. — Farmer-Progressive members of parliament will support the government in putting into effect reforms which have been advocated by the National Progressive Party, but the identity of the Progressive Party will be maintained. This was made plain by Hon. T. A. Crerar, in his first speech since the election, when he read to the convention of the United Farmers of Manitoba, a resolution adopted at the secret conference of Progressive members-elect at Saskatoon, December 20. This resolution was read as follows:

"That this meeting of the western supporters of the National Progressive Party, having taken under consideration the existing political situation in Canada and the course the Progressive Party should follow, is of the opinion that the gravity and importance of our many national problems call for a strong government.

"That the first consideration of the Progressive Party will be to support the legislation the country needs, both in the economic and administrative sense, and in the larger sense of promoting and developing the spirit of Canadian national unity; and we will extend to the Hon. Mr. King's government all reasonable co-operation and support in any efforts it may make to enact into legislation those economic and administrative reforms which have been advocated by the National Progressive Party, while at the same time maintaining the complete identity and organization of the Progressive Party."

"That resolution," commented Mr. Crerar, "or the sentiments expressed in it, will be the sentiments which will guide the Progressive members in the House of Commons."

Driver's Quick Action Saves Many Lives

Bomb Thrown at Car Goes Wide of Mark

Belfast.—A bomb was thrown at a tramcar bearing seventy-five persons to their work in the Crumlin Road district. The quick action of the driver, who put full speed on when he heard a revolver shot, resulted in the "missile" going wide of the mark. The passengers were greatly frightened by the explosion, which splintered the car. A man and his wife living near by who went to the door of their house to learn the cause of the commotion were shot dead by a volley of rifle fire which swept the streets.

German Railways May Seize Coal Shipments

Berlin.—Authorization has been given by the Government officials in charge of operating the railways for the seizure and use of private coal shipments in transit where necessary, to prevent a traffic tieup through the fuel shortage which is said to be acute on many divisions. Shortage of rolling stock and the coal deliveries to the allies are given as reasons for the fuel shortage.

Public carnivals and celebrations have been prohibited by the Prussian Government. The other federal governments have been asked to issue orders along the same lines.

Idle Land Incurs Loss

Farmers Urged to Substitute Oats for Part of Summerfallow

Saskatoon, Sask.—An appeal for experiment on the part of farmers in the matter of substituting oats sown in rows at least for a part of their summerfallow was voiced at the agricultural societies convention by Prof. Manley Champlin, of the field husbandry department of the University of Saskatchewan. Prof. Champlin pointed out that particularly under present conditions, account must be taken of the loss incurred by leaving land idle in summerfallow, a loss which had to be written off against the cost of grain production. There was also an address on farm management systems by W. C. McKillop, superintendent of the Brandon Experimental Farm.

New Kind of Fuel

Port Arthur, Ont.—The use of elevator screenings, which consist of short straw weeds, for fuel, is being practised generally in the business blocks of the city. Since the ruling of the board of health that no more screenings should be dumped into the waters of the bay, the elevators have been hard put to find an outlet for the ever-increasing surplus. Screenings are said to give off as good a heat as soft coal.

Sawyer-Massey Increases Staff

Hamilton, Ont.—A cheerful sign that business is picking up is the Sawyer-Massey Company's announcement that it has added 100 men to its payroll.

In Closer Touch With Motherland

Burnham Sees Good Results From Imperial Press Meeting

London.—Lord Burnham, proprietor of the Daily Telegraph, speaking at the production of a film illustrating the meetings of the Imperial Press Conference, of which he was chairman, held in Canada some time ago, said there was no doubt that, as a direct result of the conference and the intimate contact it brought leading British journalists into with Canadian conditions from Halifax to Victoria, the great daily newspapers of London and the province had largely increased their intelligence department regarding Canada and were carrying more Canadian news than ever before.

Lord Burnham went on to refer to the corresponding value that was being obtained by Canadian daily newspapers through the arrangement entered into between Reuters and Canadian Press Limited, whereby a valuable supplementary cable service of British news was going direct from London into their offices. Not the least important part of this new departure was the access that the Canadian Press thus got to the news of the British Press Association, the co-operative organs of British newspapers covering news of the British Isles in much the same way as the Canadian Press covers the news of the Dominion.

Withdraw Japanese Troops

Washington.—The Japanese delegates to the armament conference tentatively agreed to withdrawal of the Japanese troops from the former German Kiaochow leasehold and from the Tientsin-Tsinanfu Railway on condition that China furnish proper policing.

De Valera Says He Will Continue To Fight For Irish Independence

Work Started For Empire Exhibition

London.—The Duke of York cut the first turf at the entrance to the national sports ground at Wembley, inaugurating the work in preparation for the British Empire exhibition, which is to be held in 1925.

The Duke expressed pleasure that work would be found through the undertaking for part of the vast army of London's unemployed. He also felt gratified that the exhibition's guarantee fund had exceeded the minimum of a million pounds, and wished the important imperial enterprise every success.

Daily Newspaper Publishers Meet

Important Matters Discussed at Conference in Regina

Regina.—Publishers of daily newspapers in the three prairie provinces were in conference here discussing various matters affecting the publishing business.

The question of the additional heavy burden thrown on newspaper publishers by the 500 per cent. increase in the postage rate on second class mail matter came in for considerable discussion, and it was shown that in the case of some of the larger newspapers the increased postal rate meant an additional expense of \$2 per mail subscriber per annum.

The question of wage scales obtaining in the prairie provinces was likewise discussed at considerable length. Compared with Vancouver and Eastern Canada, it was shown that the wage scale at present operative in the prairie provinces are very much higher, so much so as to place the printing and publishing business of the three prairie provinces under a very severe handicap.

The following publishers were present: E. H. Macklin, Manitoba Free Press; E. M. Nicholls, Winnipeg Tribune; Allan Holmes, Prince Albert Herald; C. A. Elvin, Saskatoon Star and Phoenix; Burfoot Hooke, Regina Leader and Post; Thos. Miller, Moose Jaw Times; A. Tyrrell, Medicine Hat News; J. H. Woods and W. Watson, Calgary Herald; A. Ford, Calgary Albertan; A. Torrance, Lethbridge Herald; John M. Imrie, Edmonton Journal; G. McNeill, Edmonton Bulletin.

Want Reduction In Tariff

Resolution Will Be Introduced In Saskatchewan Legislature to this Effect

Regina.—The Saskatchewan Legislature has resumed sessions after the Christmas vacation. Hon. S. J. Latta gave notice of a resolution to be brought forward asking the Federal Government for a general reduction in the customs tariff; resumption of reciprocity negotiations with the United States; and placing on the free list all agricultural implements, farm and homestead machinery, vehicles, fertilizers, coal, lumber, cement, gasoline, illuminating and lubricating oils, and raw materials and machinery used in their manufacture.

Mr. Dunbar, Estevan, will introduce a resolution asking the Dominion Government to prohibit the export liquor traffic.

Hon. Mr. Dunning gave notice of a resolution pressing for reduction of freight rates. In introducing for the second reading the bill to ratify agreements for the lique experiments, Mr. Dunning stated that there was hope for success which justified the voting of additional funds.

A Beggar Capitalist

Madrid.—Mileco Pio Rodrigues, when he was rounded up in a police raid on the beggar pens of Madrid the other day, proved to be a capitalist with \$30,000 to his name in a provincial bank, while he also possesses a farm with 30 cows. This fortune is the result of many years of mendicancy.

Dublin.—Eamonn De Valera informed the correspondents that he believed his party would ignore the meeting of the parliament. In response to an inquiry regarding his plans, he said he intended to continue the fight for independence; he supposed elections would be held within six or nine months.

Such elections added Mr. De Valera, take the signing of the treaty in London as an example, would be held under the British threat of renewal of warfare, and therefore he would not accept the verdict as the uncoerced will of the people.

"There is a big line of cleavage," said Mr. De Valera, "between those standing for dependence and those for independence. Never would he under any conditions take the oath of allegiance contained in the treaty. Alluding to the Irish republican bonds, he declared they would be redeemed by whatever government was eventually established, and added that a meeting of the leaders of the Sinn Fein party would be held to consider the general position.

An important development was the issuance of a manifesto by the Irish Labor party stating that labor would participate in the elections to secure representation in the new free state government.

The method adopted in summoning those who are to ratify the treaty is held to indicate that the British desire to avoid friction in the transfer of the authority of Ireland. Instead of acting directly, the British Government acted through the Dail cabinet, leaving the Dail to initiate execution of the treaty.

The Associated Press is officially informed that the heads of the Dublin Castle would do their utmost to facilitate and expedite the provisional government's taking over full authority. Arrangements have already been made for the speedy evacuation of the auxiliaries; and as soon as the treaty is ratified by the southern parliament, evacuation of the army will begin. Any of the existing Irish officials whom the free state dismisses must be compensated from Irish funds, excepting the auxiliaries and Black and Tans, who will be compensated by the British Government.

Build Zeppelin For U.S.

London.—The London Times says it is authoritatively stated that the council of allied ambassadors has consented to the Zeppelin Company building in Germany an airship for the United States Government. Work is expected to be begun immediately.

Give your local merchants a chance. Buy at home.

DO YOU SMOKE TOO MUCH?

There are many men on whose heart and nervous system tobacco produces the most serious results. It causes palpitation, pain in the heart, irregularity of its beat, makes the hands tremble, sets the nerves on edge, causes shortness of breath and loss of sleep.

To counteract this demoralizing influence on the heart and nerves there is no remedy so sure as

MILBURN'S HEART AND NERVE PILLS

They make the heart beat strong and steady, restore tone and vigor to the nerves, and remove all the evil results caused by the tobacco.

Mr. Frank Lutes, 71 Terrace Hill St., Brantford, Ont. writes:—"I had been troubled with palpitation of the heart for a number of years, and by spells it would bother me a lot. The doctor told me it would stop on me sometime if I did not cut out tobacco. When I would get a spell my heart would pound, and I would break out in a perspiration, and get so weak I would have to sit right down and quit my work; also in the night I would wake up and my heart would be going, I should say, about 120 beats a minute. About three years ago I got a box of Milburn's Heart and Nerve Pills, took them, and found they did the job. I am feeling fine and have gained over 20 pounds in weight."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

One third of your life is allotted to sleep. Do you get your share?

The most important period in the process of applying nutrition to the repair of the body is while you are asleep. For the most favorable transformation of digested food into nerve and cell tissue, so doctors tell us, sleep is absolutely essential.

Is it any wonder that those who suffer from lack of proper sleep are weak, pale and lacking in energy or ambition?

One of the causes of insomnia is nerve-irritation from tea and coffee drinking. Tea and coffee both contain caffeine, which has a tendency to cause undue stimulation. The irritating effect of caffeine often

results in insomnia, depression, and a weakened nervous system.

You can easily overcome these troubles by drinking Postum instead of tea or coffee. Postum is a delicious, satisfying cereal beverage, and it is absolutely free from caffeine, or any other harmful substance.

Ask your grocer for Postum. Drink this delicious, refreshing beverage for ten days. Then see if you do not feel better and more clear headed, and if you do not sleep better at night—as so many other people have proved for themselves.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum for Health "There's a Reason"

Made by Canadian Postum Cereal Co., Limited, Windsor, Ont.

Note and Comment

The special train which the Provincial government is sending over the lines of the C. P. R., with demonstrations on dairy cattle, bacon hogs, etc., will not visit any point in this constituency except the town of Coronation. From Lacombe to Coronation, a trifle over a hundred miles, this train will make five stops, an average distance of twenty miles apart, yet the whole eastern end, a distance of eighty miles, from Coronation to Compeer, has been neglected entirely. On the north line, from Hardisty to Hayter, sixty-two miles, the train makes three stops.

While it may now be a little late to have schedule changed, still a vigorous protest should be made to the Department.

Recently we were approached by a young fellow who wanted to know if his business was hard and exciting work and if there was any real joy in it. Well, we tried to puff up our own job, but once we had a chance to write the obituary of a man who had passed on a slide when we were a kid.

A noted Doctor says that exercise will kill all germs. But how are you going to get the dog gone things to exercise?

A subscriber wants to know how to finish an oak floor. We would suggest that he turn the kids loose on it with their roller skates.

BACON TYPE HOGS

Select bacon hogs must weigh between 160 and 210 lbs., at the packing plants (170-220 lbs. on the farm).

Very little more than one-half of the hogs are now being marketed within the weight-limit to yield exportable "Wiltshire sides."

There is only a very limited market for the fat, hard-type of hog in Canada; that limit seems about reached.

But there is an almost unlimited market for bacon in Great Britain, provided it is that which the British consumer desires.

Great Britain imports normally about 800,000,000 lbs of bacon every year, roughly 12,000,000 lbs a week.

In 1913, the year before the war, imports from Canada were under 24,000,000 lbs—just two weeks' share of the normal im-

port.

A "Wiltshire side" is a trade term for the shape of the cut. It is one-half of the carcass without head and feet.

These sides are only given a light pickle in Canada. The smoking and cutting for retail are done by British curers.

Domestic taste shows a tendency to prefer lean, streaky bacon very similar to the prevailing taste in Great Britain.

One type of hog will therefore cater to both the domestic and export trades.

The standard set requires jawl and shoulder light and smooth, back and neck to tail evenly fleshed, side long, medium depth dropping straight from back, ham full, good general finish, no excess fat.

As Canadian packers can find only a limited market for hard types they cannot indefinitely take them off the hands of farmers who misguidedly continue to produce such hogs.

There must be uniformity in East and West, and both must furnish exactly what the British consumer wants if Canadian farmers are to get the premium which packers agree to pay after May 1st.

In the common interest the breeding of fads must be discouraged. Their carcasses do not yield the right conformation for "Wiltshire sides."

Conformation or shape is as important as weight.

Farmer-producers are most likely to get the right bacon types among well-selected Yorkshires, Tamworths or the bacon sub-section of the Berkshire breed.

Other breeds are unsuitable and the average farmer cannot afford to breed them.

The two inter-linked and essential halves of the livestock industry are:

1. Production and marketing of farm animals.
2. Manufacture and marketing of meat.

World Happenings Briefly Told

A French airplane with a 950 h.p. engine and built entirely of metal, has been perfected.

A manufacturing concern in Cleveland communicates with its other office at Pittsburgh by wireless.

During the 1921 bull fighting season, which has just closed, there were killed 28,764 horses, 1,692 bulls and four bull-fighters.

Two hundred cocoanuts which contained not their natural milk but Jamaica rum, were seized by federal agents at a Minneapolis railroad station.

Rev. P. W. Philpott, pastor of the Gospel Tabernacle, Hamilton, has refused a call to the Tremont Temple, Boston, which has offered him a salary of \$20,000 or almost four times his present pay.

The Ford plants have reopened in Detroit after being closed nearly a month for inventory and repairs. The rotation plan of employment by which 40,000 men are kept on the payroll, with 32,000 working at a time, was retained.

Falling 120 feet into a canyon when he slipped from the C.N.R. bridge, at Vancouver, Herbert Henry Barber was instantly killed. He was stretching a telegraph wire across the canyon for the Canadian National system when he overbalanced.

Charles Garland, who 14 months ago refused \$1,000,000 from the estate of his father, the late James A. Garland, of Boston, because it was inconsistent with his views regarding property, confirmed a report that he had had a change of mind, and that he would accept the legacy.

Colonel John Bigelow Dodge, who was arrested by Bolshevik authorities at Batum, Dec. 9, as an alleged secret British agent, has now been released, according to a despatch to the London Times. It was officially explained from Moscow that his arrest was an error.

Corns, Warts, Bunions, Painlessly Removed

Don't limp any longer, don't suffer another hour from corns. The old remedy and the best, the one that for fifty years has proved a true success, will lift out your corns in a hurry. Putman's Painless Corn and Wart Extractor is the one remedy to use. Refuse a substitute, 25c every where.

Short Closed Season For Fish Commercial fishing in Alberta for coarse varieties of fish is now permitted for ten and a half months of the year, under a new regulation recently issued. The closed season is from April 1st to May 15th. The regulation does not apply to waters in which there are trout, whitefish or tulbees.

Too True "You can always depend on the enmity of your enemies," notes a cynical contemporary, "but there are times when you can't count on the friendship of your friends."

W. N. U. 1403

MICHAEL A. HARGADON, Author of Irish and Canadian Poems

"Irish and Canadian Poems"

Volume of Verse Which is Attracting Wide Attention

A most valuable and delightful contribution to Canadian literature is a recently published book, "Irish and Canadian Poems," by Michael A. Hargadon. No one can peruse its pages without coming under the spell of this enchantment. A very wide range of subjects are treated in most simple style and yet with a wealth of understanding and sincerity. With an evident love of nature and a gift of imagination, Mr. Hargadon's descriptive poems of Ireland are delightful. None the less pleasing are his verses dealing with the scenic beauties of Canada, the land of his adoption.

All lovers of poetry will surely revel in this volume, for the themes will strike a responsive chord in the hearts of everyone. Nicely printed and illustrated with many beautiful Canadian and Irish scenes, the book will prove a valued possession. The ever genial George H. Ham writes a fitting introduction to the work of this brilliant young poet.

A Cordial Invitation To Disease

This is an apt description of Constipation. It's an unnatural condition to begin with—but it's dangerous because it leads to indigestion, fills the system with poisons, brings on anemia. You don't need a purgative, you don't want to weaken the system by a harsh gripping medicine—what you need is mild natural stimulant to the bowels. You get just what you need in Dr. Hamilton's Pills which tone up the liver, restore the bowels to perfect action and positively end constipation. You'll feel tip top after regulating your system with Dr. Hamilton's Pills. Good for young and old—a real family medicine, 25c all dealers or The Catarrhose Co., Montreal.

Our Ever-Changing Weight Weighed in a delicate scale it would be found that your weight is a very tickle quality. If the scales are delicate enough it would be seen that the mere act of stepping from the platform and back entails a loss of weight. The "baiting" of an eyelid means an expenditure of energy and a consequent loss of weight.

Hoarseness Rubbed Away Quickly By Nerviline

Changeable weather causes congestion and sore throat. The blood must be drawn from the inflamed part, and this is speedily done by applying Nerviline. The beauty of Nerviline is that it penetrates quickly. It is not oily and every drop sinks right in. It draws out the inflammation, eases the pain, makes the chest and throat well quick. For relieving coughs, colds, hoarseness, Nerviline is the proper remedy. Thousands say so. Large 35c bottles sold everywhere.

Sao Paulo, the second city of Brazil, has one of the finest municipal theatres in the world, costing several million dollars.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

The use of coal was at one time strictly prohibited in London on the ground that the air was rendered impure and unwholesome.

Horsehooves of cowhairs are, it is said, made in Australia.

Minard's Liniment for Warts, Corns, Etc.

WHY IS IT

that chronic skin diseases which have defied all other treatments yield to Zam-Buk?

It is because Zam-Buk is germicidal, and also has such power of penetration that it reaches disease in the underlying tissues and cures from the "root" up. That is the only way a permanent cure can be effected.

Mr. H. C. Buckley of 461 E. Broadway, Portland, Oregon, says: "For chronic skin diseases—there is nothing like Zam-Buk. For fifteen years I had eczema, and I tried an endless number of so-called 'eczema cures,' but nothing was capable of curing me permanently until I used Zam-Buk. Ten months' use of Zam-Buk has effected a complete cure."

For ulcers, abscesses, boils, ringworm, blood-poisoning, piles, burns, scalds and cuts, Zam-Buk is equally good. All dealers or Zam-Buk Co., Toronto. 50c. box, \$ for \$1.25.

Modern Agitation And Burma, too, is demanding political independence. The fact is the restless peoples of the eastern hemisphere don't know just what they want, but they want it—Hamilton Herald.

WINTER WEATHER HARD ON LITTLE ONES

Our Canadian winters are exceedingly hard on the health of little ones. The weather is often so severe that the mother cannot take the little one out for an airing. The consequence is that the baby confined to overheated, badly ventilated rooms; takes cold and becomes cross and peevish. Baby's Own Tablets should be given to keep the little one healthy. They are a mild laxative which regulate the stomach and bowels and thus prevent colds. The Tablets are sold by medicine dealers or by mail at 25 cents from The Dr. Williams' Medicine Co., Brockville, Ont.

World's Slow Speed Record

Turtle Travelled a Little Over a Mile in Three Years

Turtles that Prof. A. S. Pearce, of the University of Wisconsin, tagged and let loose, have achieved what is believed to be a world's record for turtle speed. Prof. Pearce announced at Toronto at the convention of the American Association for the Advancement of Science that one turtle had travelled a little over a mile in three years, 11 months and 19 days. The average distance covered by 166 turtles in 5 months was 115 yards. Prof. Pearce has determined that the density of turtle population in a swampy region on the shore of Lake Menota, Wis., is five to twenty-five per acre.

CATARRHAL DEAFNESS

Is greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE, a constitutional remedy for Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing. When it is completely closed, Deafness is the result. Unless the inflammation is removed, your hearing cannot be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surface of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

Circulars free. All Druggists.

Simple White Satin Evening Gown

By Marie Belmont

The mode of all white for evening here finds charming expression in white satin outlined in pearl beads. The slim, straight silhouette forms an effective contrast to the bouffant tucks that are finding their way into every ballroom scene.

The beauty of this gown lies in its simple inspiration. The dress is made of two straight panels, of which the back one is left plain across the neck. The straight panel is slit down the front a short distance from the neck. The points are then pulled over to each shoulder, forming a V-neck, with an irregular line extending down the sides to the waistline. The satin underlay has lace-trimmed accordion chifton at the sides. The panels are held together at either hip, a pearl cabochon finishing the left side.

Dyed Her Sweater, Skirt and Draperies

Every package of "Diamond Dyes" contains directions so simple that any woman can dye or tint her worn, shabby dresses, skirts, waistcoats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—not other kind—then perfect home dyeing is sure because "Diamond Dyes" are guaranteed not to spot, fade, streak or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

Expect Large Fish Catch

Companies Are Active On Northern Lakes In Alberta The value of fish taken by commercial inland fishing enterprises in Manitoba, Saskatchewan, Alberta and the Yukon last year totalled \$2,108,257. Great activity is prevailing among fish companies in the northern lakes of Alberta this year, and the catch is expected to exceed that of any previous year.

BEAUTY OF THE SKIN is the natural desire of every woman, and is obtainable by the use of Dr. Chase's Ointment. It removes all roughness and redness of the skin, irritations and eczema disappear, and the skin is left soft, smooth and velvety. All dealers, or Edmondson, Bates & Co., Limited, Toronto. Sample free if you mention this paper.

Dr. Chase's Ointment

STAMMERING or stammering overcome positively. Our natural methods thoroughly cure natural speech. Graduate pupils everywhere. Free advice and literature. THE ARNOTT INSTITUTE KITCHENER, CANADA

Let Cuticura Be Your First Thought Always

When the first signs of pimples, redness, or roughness appear, smear gently with Cuticura Ointment to soothe and heal, then bathe with Cuticura Soap and hot water to cleanse and purify. Finally dust on the refreshing Cuticura Talcum, a delicately medicated exquisitely scented powder. If used for every-day toilet purposes, Cuticura does much to prevent skin trouble. See the Cuticura 25 and 50c. Talcum 25c. Sold everywhere. Write for literature to E. C. Cuticura, Limited, 214 St. Paul St., W. Montreal. Cuticura Soap shows without name.

Bad Either Way Boss—You say she has driven two men insane? Tess—Yes. She silted one and married the other.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This remedy will give you the aid you need so surely. Choking ceases, breathing becomes natural and without effort. Others, many of them have suffered as you suffer but have wisely turned to this remedy and ceased to suffer. THIN, FLAT HAIR GROWS LONG, THICK AND ABUNDANT

"Danderine" costs only 35 cents a bottle. One application ends all dandruff, stops itching and falling hair, and in a few moments, you have doubled the beauty of your hair. It will appear a mass, so soft, lustrous, and easy to do up. But what will please you most will be after a few weeks use, when you see new hair—fine and downy at first—yes—but really new hair growing all over the scalp. "Danderine" is to fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. This delightful, stimulating tonic helps thin, lifeless, faded hair to grow long, thick, heavy and luxuriant.

CORNS Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Fressone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Fressone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the callosities, without soreness or irritation.

Minor School 12 noon
Home School 3 p. m.

Monitor Church 7.30 pm
Sunday school in the church at 12 o'clock noon.

Everyone is cordially invited to attend these services.

The demand for more frequent service on branch lines where passenger traffic is not heavy is something the railways have long had to contend with. The heavy expense of running frequent trains to accommodate a limited number of passengers on branch lines has given railway men much food for thought. The Canadian National Railways, on its Brockville & Westport Div. has for some time been experimenting with motor driven railway cars. Instead of the regular engine and heavy train of passenger coaches, this railway has adopted equipment much like a motor bus which runs on the regular railway tracks. It is operated by one man, gives a frequent service and so far appears to be extremely successful. If continued use proves satisfactory, the plan will be adopted on other branch lines of the Government Roads.

One of the big problems which faces the Canadian Red Cross Society is that of getting in touch with relations of Canadians who are in European countries. The greatest difficulty is experienced in this respect with Soviet Russia. The League of Red Cross Societies in Geneva, however, is hopeful that better arrangements may soon be concluded with this country.

The Provincial Headquarters has received many expressions of appreciation from all over Alberta for Xmas cheer which they distributed in the different districts.
